

Strain Relief Assembly Pliers

R29 and R30

R29 hand pliers are adjustable for all Heyco strain relief bushings (except SR3A-4 and SR4A-6) that assemble into holes up to 7/8" diameter.

R30 adjustable hand pliers are for use with strain relief bushings that assemble into 3/4" and larger diameter holes.

R291 (not shown) hand pliers are adjustable for parts SR3A-4 and SR4A-6 only.

R301 (not shown) hand pliers are adjustable for parts SR7N-2 and SR8N-2 only.

R100

R100 hand pliers are designed specifically for Lockit strain relief bushings (excluding ST201N). Please call us for information on semi-automatic assembly equipment.

Air Tool

Hand air tool eliminates operator fatigue and improves assembly rates. Activated with a flap handle, the air tool has interchangeable jaws to cover our entire range of strain reliefs. The included air fittings and hose make connection to your compressed air system a snap.

One set of jaws is furnished with each air tool. A different set of jaws is needed for each mounting hole diameter and special jaws are required for SR3A-4 and SR4A-6. Please advise both the mounting hole size and the strain relief part number when ordering an air tool or air tool jaws.

There is a **conversion kit** available which provides the necessary components to convert a hand air tool to a bench mounted unit. The bench air tool can be mounted in any convenient position on the assembly area work surface. Unit is foot activated, leaving the operator's hands free.
