# Nylon Shoulder Washers/Screw Insulators

**SPECIAL** Tolerances all dimensions:  $\pm .015$

Suitable for a variety of insulation and mechanical applications. They seal, reduce vibration, act as spacers, guides, bushings and bearings. Isolate metal screws electrically and reduce corrosion. They can also be used as light load

bearings in many applications.

Shoulder washers are shown with the prefix **NSW**. Screw insulators are for standard screw sizes (#2 up to 1/4) and are shown with the prefix **SC**. Shoulder washers can often be interchanged with

screw insulators, but they tend to have a shorter shank (L dimension).

**Custom sizes can be tooled for moulding.** Please specify size, quantity and tolerances when requesting a quote.
