

Wire and Paper Grommets

WIRE GROMMETS

Used extensively on computer and office furniture to eliminate the chaos of office machine cords and computer cables.

Rectangular: Designed for an opening of approximately 3-1/4" x 1-7/8", this grommet features two different caps made to fit both bushings (one for wood and one for metal furniture). Cap #1, with a textured finish, has two separate half caps that come together to form a round hole. Cap #2 is a single piece with a smooth finish and a rectangular opening. It has a split body on one end to allow oversize connector bodies and plugs to be inserted. These all come in black, putty, walnut, light gray and white.

Round: The 2" system consists of a grommet, cap and slot cover which fits a 2.000" hole and comes in a smooth finish. It is available in black, putty, walnut, light

gray and white. In plated finishes, choose from chrome, antique or bright brass.

The 3" system, with its unique retractable self-storing slot cover, fits a 2.750" hole. In the closed position, the slot cover presents a neat, flat profile. In the open position, it provides a large opening for easy access to either retrieve the cover or remove the entire cap system from the grommet. Available in black, putty, walnut, light gray and white.

The 3-5/8" system is designed for applications with multiple or large leads, connectors or plugs. It press-fits into a 3.250" hole. Available in black, beige, walnut and light gray.

PAPER GROMMETS

These help eliminate paper jams and keep computer paper feeding smoothly.

Low profile: Made of high impact polystyrene, this grommet accommodates computer paper up to 16" wide and fits into a 1-5/8" x 16-5/8" slot. Its ultra thin lip (.040") makes an ideal bushing to be installed under any type of printer. There is an optional divider bar that snaps easily into place to allow for two-way paper flow.

Available in matte finish black, putty or walnut.

Standard, impact-resistant: Considered to be the industry standard, this grommet accommodates computer paper up to 17" wide. It fits into a 1.671" x 17.156" slot. Available in black, beige and walnut.
